Subject: SC needs Uber

This is basically a virtual dispatch service for people who need transportation NOW. Try getting a "cab" at GSP after midnight on a weeknight and see how long you wait.

Why don't we try and work with uber instead of a cease and desist? It's another disappointing day in SC.

Shelly Roehrs

Please, do not take Uber away from South Carolina! I live in Charleston, SC. I have used our "taxi" services here for years only to be left hanging again and again. Which has resulted in my driving when I knew I should not, waking friends up to come and get me and getting in the car with someone else that should not be driving! The Taxis here are not reliable nor are there enough of them. They are not easy to find when you really need them! Uber has been easy to use, safe and very reliable. There is definitely enough business for the regular Taxi services and Uber! It will be a dangerous shame to block Uber from SC ....especially here in Charleston!

I have used Uber in Miami when I visited there, and what a pleasure. The cars are clean, the drivers are professional and I have always felt safe. Unlike the times I have had to use a cab service there or in any other city, including Columbia. We need Uber here in Columbia! I was so excited to hear that they were here. I would never use cab service here or allow my child to do so. I thought we have finally arrived! We are catching up with the larger city benefits. How are we to become a bustling vibrant city that has safe and clean transportation alternatives if we continue to block progress. If I were a visitor I would not want to use the cab services available to me and unfortunately our public transportation is not anywhere where we need it to be. So please don't turn away a great service (clean,safe,professional) that we so desperately need! We would be going backwards instead of moving forward in making this a wonderful city to enjoy with available transportation to all who needs it.

why do you abuse your legal power? uber is a great company. I'm sorry you are losing money on your south Carolina taxis but this is America. supposedly if you develop a superior product you out compete another product, and they either have to adapt or die. all of you politicians are blood leaches. money is the only reason yall do anything.
